

Cisco Workshop

Segmentation Untangled: Streamlining Hybrid Data Center Security

Event Details

Day & Date: Wednesday | 29th October 2025

Timing: 9:00 am to 1:30 pm IST followed by lunch

Location : ITC Gardenia, 1, Residency Rd, Ashok Nagar, Bengaluru

Hall name: Magnolia

As applications, devices, and users multiply and evolve, maintaining security and control becomes increasingly challenging. Achieving scalable and effective segmentation in hybrid data centers is a challenge for many. Cisco is here to help wherever you are in your segmentation journey.

Join us for a hands-on workshop led by Cisco technical experts. They will guide participants in developing effective segmentation strategies using Cisco Data Center Security, supported by Secure Firewall, Secure Workload, and Identity Services Engine (ISE).

Participants of this 4-hour workshop will:

- Gain end to end visibility into users, devices, applications, and workloads, down to the process level, with and without agents
- Apply varying levels of segmentation tailored to your environment, from macro to micro segmentation
- Identify, prioritize, and mitigate vulnerabilities and advanced threats
